# repl.it

https://repl.it/
Getting started

1. Go to repl.it, copy and paste in your browser, link
   https://repl.it/
2. Click on "Start coding" button.

1. Sign in using Gmail account or register with your preferred email.

1. In case you're using gmail, choose your gmail account.
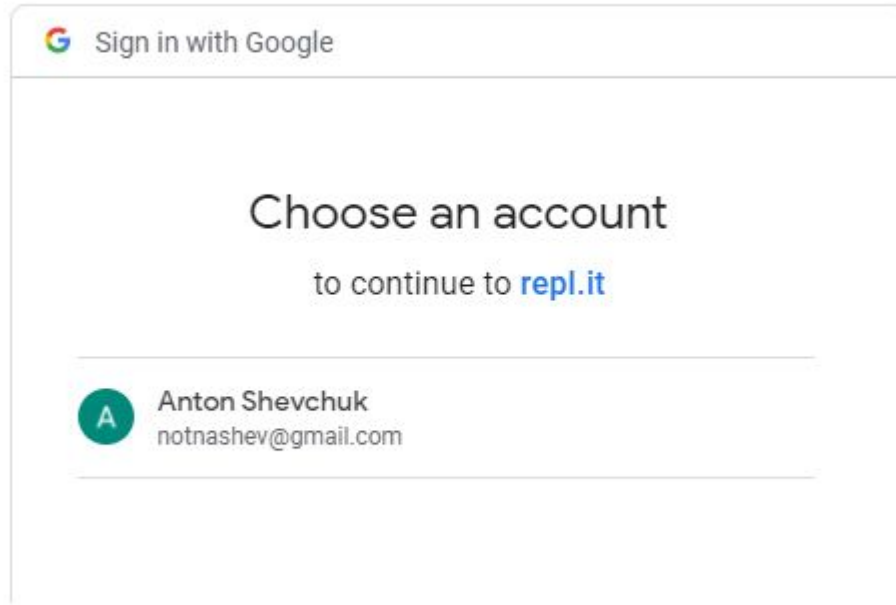

1. On the left side of the page, there is sidebar with your work and different settings.
2. Click on "+ New repl" to create your working environment.
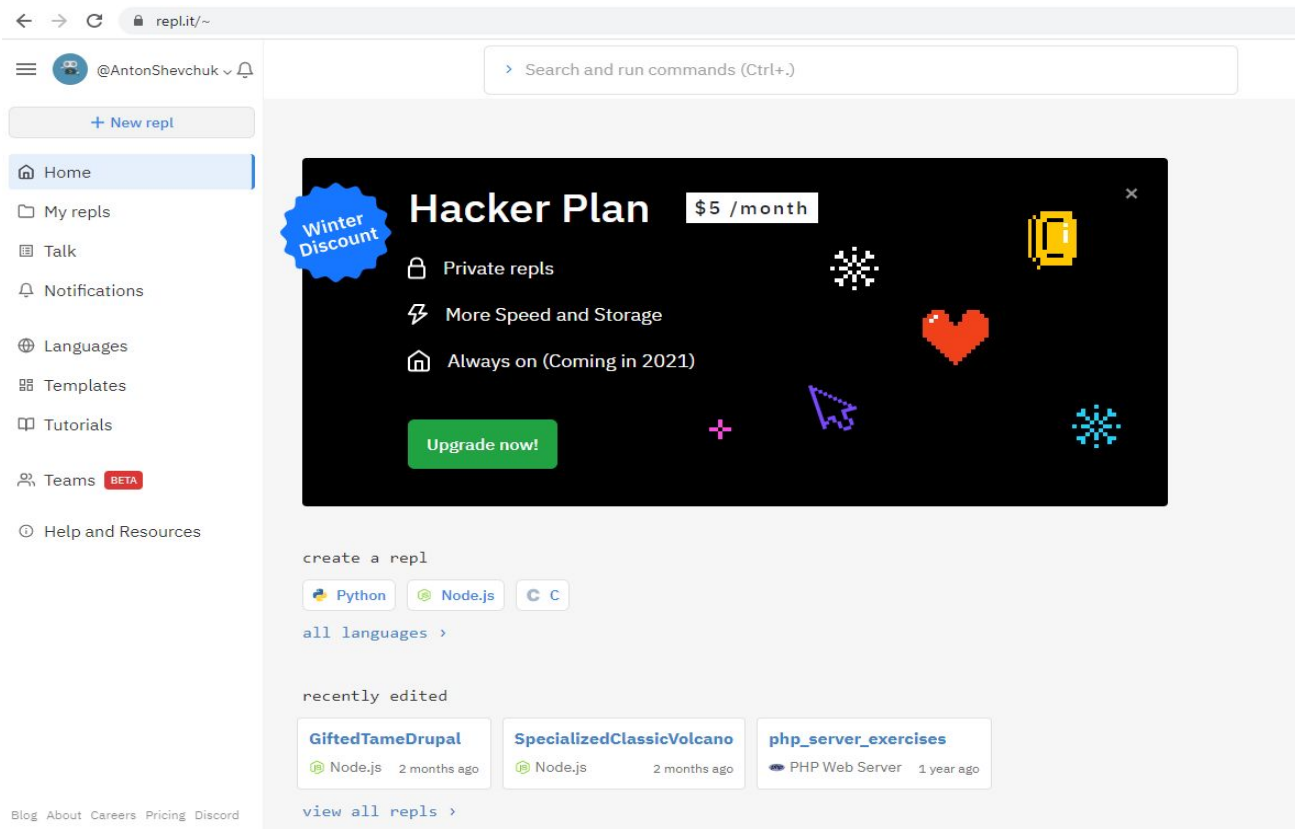

1. Inside left dropdown, start typing letters html. It will give you option HTML, CSS, JS. Click on it. This is what we need.
2. Inside right text field you can name your repl, or leave it as it is. It's not mandatory right now.
3. Click on "Create repl" to start working with your environment.

1. You should see page with 3 sections.
   a. Left one, displaying list of files you will be working with.
   b. Middle section displaying current file code.
   c. Right one, showing result after executing your code.
